-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Interpretation

2. In view of the claim language, "a coated metal powder coated on the surface of the ferromagnetic metal powder with the coating material", the coating material that is coated on the ferromagnetic metal powder also includes "a coated metal powder" (claim 1, lines 4 and 5). Thus, as drafted claim 1 is directed to a coated ferromagnetic powder metal powder coated with a coating material wherein the coating material is a phosphoric acid compound containing aluminum and the coating material also contains a coated metal powder. In other words, the claimed metal powder is itself coated with a coating that contains coated particles and a phosphoric acid compound containing aluminum.

Claim Rejections - 35 USC § 112, First Paragraph

3. Claims 1 to 15 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a coated ferromagnetic metal powder coated with a coating material wherein the coating material is a phosphoric acid compound which

Art Unit: 1742

contains aluminum, the specification does not reasonably provide enablement for the claimed invention as set forth above under the heading, "Claim Interpretation". The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make the invention commensurate in scope with these claims.

4. The specification teaches how to make a coated ferromagnetic metal powder coated with a coating material wherein the coating material is a phosphoric acid compound which contains aluminum. However, the specification does not teach how to make the claimed coated ferromagnetic metal powder which is itself coated with a coating that contains coated particles and additionally phosphoric acid compound containing aluminum. Claims 1 to 15 as presently drafted are not directed to the disclosed invention.
